

OASIS FERTISS

INTRODUCING

OASIS® fertiss® Growing Medium

OASIS® fertiss® Propagating Plug System

Used by European growers for years, fertiss® is a special blend of long fiber sphagnum peat moss, perlite, and vermiculite that is pH adjusted. A long lasting wetting agent is added to enhance water holding abilities. The media is bound by a cellulose non-woven net which is easy for plant roots to penetrate.

Air moves easily around the plug in each cell and through the bottom of the cell's cavity. Water drains easily through the medium and the bottom hole. Healthy and vigorous roots develop rapidly throughout the plug and are naturally air pruned.

Fertiss® comes ready-to-use in a pre-filled propagation tray for rooting of starter plants. This unique plug is suitable for propagation of unrooted cuttings of annuals, perennials, nursery stock, forestry plants, and germination of seeds.

306 (7 cm) Basket Packs

18 cell (7 cm) sheet

Fertiss® offers a versatile system and key benefits:

- Pre-filled trays, simple to use
- Consistent and even media blend
- High air porosity
- Good drainage
- High rate of cutting take
- Ideal for difficult to root species
- Natural air-pruning
- Time, labor, and energy cost savings

105 Round Cells

Product/Description	Item Code	Plug Size	
		Diameter x Length	Unit of Sale
105-Count Square Cell Tray	5305P2	(3 x 4 cm)	400 trays/pallet
105-Count Square Cell Tray	5305C2	(3 x 4 cm)	14 trays/case
72-Count Square Cell Tray	5372P2	(3.2 x 3.5 cm)	480 trays/pallet
72-Count Square Cell Tray	5372C2	(3.2 x 3.5 cm)	16 trays/case
26-Count Round Cell Double Strip	5326P	(3 x 4 cm)	1012 strips/pallet
26-Count Round Cell Double Strip	5326C	(3 x 4 cm)	60 strips/case
25-Count Round Cell Double Strip	5325P	(3 x 4 cm)	1192 strips/pallet
25-Count Round Cell Double Strip	5325C	(3 x 4 cm)	60 strips/case
18-Count Square Cell Tray	5318P	(7 x 7 cm)	224trays/pallet
18-Count Square Cell Tray	5318C	(7 x 7 cm)	7trays/case
